

# BRACKETS

The Container Strut Mount (CSM) Brackets allow for hassle free mounting of Strut Channels inside any shipping container with ISO 9910 corrugations.

## **NO MORE DRIVING SCREWS THROUGH CONTAINER WALLS**

Designed and Laser Cut to fit both side wall and end wall corrugations.

Self-tapping screws or bolts protruding from the exterior are a safety hazard and will render your container unshippable.

## **NO MORE WELDING**

- Made in America
- Powder Coat Finish
- Ideal for Installing Modular Shelving, Electrical and Mechanical in Containers

Future add-ons, such as shelving brackets are a breeze when you have struts installed. **Struts CANNOT** be installed once a container has been spray foam insulated.
